The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4 and 14 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Moriya, of record.

The previous rejection still applies. The new limitations do not structurally distinguish over the applied art as the channel region of the carbon nanotubes is clearly positioned between the conductive alignment (source and drain) regions. The channel region is defined as the CNT material between the s/d regions (para.12).

Applicant's arguments filed 12/15/04 have been fully considered but they are not persuasive. Arguments that the nanotubes are not between the source and drain regions are unconvincing. Clearly the nanotubes must be located between the s/d regions to function as channel regions. The fact that they also overlap the s/d regions does not negate their structure. The claims are broad. The limitation "in communication with" likewise does not structurally distinguish over Moriya as the CNT are in electrical communication with the conductive contacts. The claims are broad. Arguments regarding claim 14 are also not persuasive as the s/d regions or electrical contacts to the s/d regions in Moriya define "device interconnection regions" and the CNT are adjacent to and in communication with these "device interconnection regions".

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

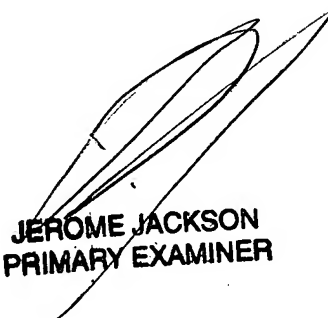

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
